

PRODUCT CHANGE NOTIFICATION

Central Base Station External Antenna Option

Issue Date: October 19, 2021

Effective Date: October 19, 2021

DEVICES

Part Number	Revision Code
CBSSW-450-002	K-0 or greater
SS450-002	H-0 or greater

DESCRIPTION OF CHANGES

Central Base Stations (CBSs) with revisions noted in the table above have been updated to accept an optional external antenna.

REASON FOR CHANGES

While CBSs have an excellent RF range, there are instances where customers may want to install a CBS in a location that inhibits the RF signal. The updated design enables installers to attach an external antenna that can be mounted remotely to extend the RF range. For instructions on how to install an external antenna, please review the document in the link below.

Those who do not need extended range may continue installing and using the CBS exactly as they did prior to the design update.
